

## ITC Covid – the elegant occupancy control during pandemic era

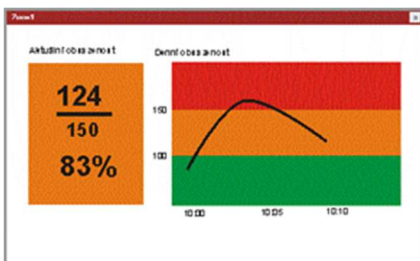

**... the ongoing Occupancy and number of customers regulation tool in Stores, Stores chains, Malls and also in the other closed objects inside or outdoor.**

ITC Covid is the intelligent extension of the FootFall /People Counting/ System which measures the ongoing Occupancy rate in Malls, stores and other closed spaces. The System also automatically provides the alarm notices of the previously set up Security limits when reached on the optional technical devices/PC, mobiles, screens, etc./ **This special service can be used not only during a pandemic era but also under standard retail conditions.** The SW application can be also used for the observance of the Fire safety regulations rules.

### 3 various possibilities of use

- for the Management only (the output of data on PC's and Mobiles);
- automatic regulation Occupancy process on a display screens at the entrances;
- on web pages, Facebook. etc.. for the potential visitors/clients

### Information for the Management

- the application available via web browser from PC or Mobile;
- provides information of the ongoing Occupation on monitored area;
- definition of the individual Security areas/ borders (green, orange, red);
- provides online alert about reached set up safety Occupancy limits;
- shows continual online Occupancy progress and enables prognoses of the further development

### Informational display/screen/ on the entrance/entrances

Automatically informs visitors/clients if they can safely enter or not

**SAFE TO ENTER** – the entrance is allowed

**DO NOT ENTER** – the entrance is temporally forbidden

Applied displays could be used out of the pandemic time for marketing purposes:

- promotion of marketing activities;
- special offers, discounts, etc. of yours and your tenants
- operational information for visitors.

### Information of the ongoing Occupancy situation of the object on your web sites

Very useful functionality for your clients by providing them with the information of ongoing Occupancy situation onsite of your Mall or store for them to choose a right time for their visit on the virtual traffic lights:

**RED** – Please come a later on when the store/mall traffic will be less busy.

**ORANGE** – Store/mall is still a bit busy and you might wait to visit your favourable stores

**GREEN** – In store/mall is right now a low traffic. We recommend your visit just now !
